Biodegradable Biliary and Pancreatic Stent

The **ARCHIMEDES** stent is a **Biodegradable Biliary** and **Pancreatic** stent intended to be used to drain obstructed biliary or pancreatic ducts. The patented **Dual Drainage Design** Helical of the stent **allows for bile to flow** on the outer surface of the device while supporting the opening of the lumen.

Developed and designed to be placed **endoscopically**, **percutaneously**, or **surgically**, either open or **laparoscopic surgery**, the **ARCHIMEDES** provides a flexible and innovative solution that can **help reduce complications and the costs associated with them by removing the need for unnecessary additional clinical interventions.**

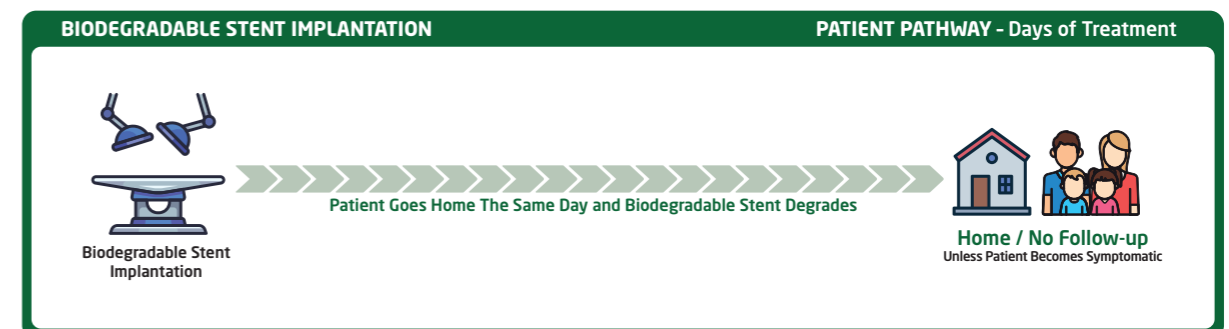

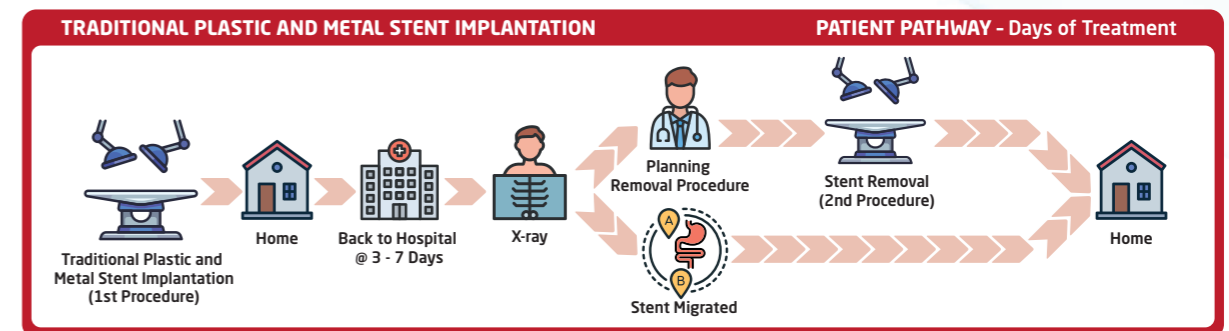

1. 2019 Frost & Sullivan Independent Market Research Report.  
 2. The different degradation profiles are designed for obstructed biliary or pancreatic ducts with various underlying diseases.  
 3. **Minimal Strength Retention** is defined by the presence of **at least 10% of an initial strength parameter.** The Stent remains **intact with no breaks**, tested in a simulated degradation model.

## DEGRADATION PROFILES

Recommendation for the use of ARCHIMEDES stent degradation profiles to potential underlying diseases

Stent Degradation Profiles <sup>2</sup>	Minimal Strength Retention <sup>3</sup>	Underlying diseases with obstructed biliary duct	Underlying diseases with obstructed pancreatic duct
<b>FAST</b> degrading stent	<b>12 days</b>	<ul style="list-style-type: none"> <li>Cholelithiasis / Choledocholithiasis</li> <li>Acute biliary pancreatitis</li> <li>Cholangitis</li> <li>Modified anatomy procedures involving biliary and pancreatic ducts such as liver transplants, Whipples and alike</li> </ul>	<ul style="list-style-type: none"> <li>Post ERCP pancreatitis</li> <li>Acute pancreatitis</li> </ul>
<b>MEDIUM</b> degrading stent	<b>20 days</b>	<ul style="list-style-type: none"> <li>Cholelithiasis / Choledocholithiasis</li> <li>Biliary leaks</li> <li>Cystic duct leaks</li> <li>Resectable CBD obstruction</li> <li>Cholangitis</li> <li>Modified anatomy procedures involving biliary and pancreatic ducts such as liver transplants, Whipples and alike</li> </ul>	<ul style="list-style-type: none"> <li>Pancreatic duct disruptions leaks</li> </ul>
<b>SLOW</b> degrading stent	<b>11 weeks</b>	<ul style="list-style-type: none"> <li>Cholelithiasis / Choledocholithiasis</li> <li>Benign biliary strictures</li> <li>Malignant strictures</li> <li>Biliary leaks</li> <li>Cholangitis</li> <li>Modified anatomy procedures involving biliary and pancreatic ducts such as liver transplants, Whipples and alike</li> </ul>	<ul style="list-style-type: none"> <li>Chronic pancreatitis</li> <li>Pancreatic duct strictures</li> </ul>

Indication: **Pancreatic Stent For PEP Prophylaxis.** Data from Dr. Andreas Maieron report at <https://www.sciencedirect.com/science/article/pii/S1590865822008593>

\* PLEASE NOTE that the suitable degradation profile of the stent to treat the obstructed biliary or pancreatic duct must be chosen by a clinical professional, always taking the underlying disease and the condition of the individual patient into account.

The product official name is **ARCHIMEDES BPS Biodegradable Pancreaticobiliary Stent**

**INTENDED USE / INDICATION:** This device is used to drain obstructed biliary or pancreatic ducts and is indicated for obstructed biliary or pancreatic ducts.

**Instructions For Use:**

1. Ensure full extension of anti-migration struts.
2. Load introducer sleeve over one end of stent.
3. Introduce introducer sleeve and stent onto a pre-positioned guidewire advancing pushing catheter in 1-2 cm increments until the stent is in desired position. For modified anatomy procedures intraoperatively, position stent manually.
4. Fluoroscopically, radiographically and or endoscopically confirm desired stent position. Inject contrast, if desired, to fluoroscopically visualize stent position.
5. After confirming stent position, gently remove guidewire from endoscope, if applicable, while maintaining position of the stent with pushing catheter.
6. Gently remove pushing catheter from accessory channel, if applicable.
